Welcome to Dillinger 4

- Text Formatting 4
- Lists 4
- Task Lists 5
- Links and Images 6
- Blockquotes 8
- Code 8
- Tables 9
- Footnotes 10
- Math 10

Welcome to Dillinger

A clean, distraction-free markdown editor. Type on the left, see the rendered output on the right.

Text Formatting

Markdown makes it easy to format text. You can write in **bold**, *italic*, or ~~strikethrough~~. Combine them for ***bold italic*** text. Use `inline code` for technical terms.

Lists

Unordered lists use dashes, asterisks, or plus signs:

- Import files from GitHub, Dropbox, or Google Drive

- Export to Markdown, HTML, or PDF
- Drag and drop files directly into the editor

Ordered lists are numbered automatically:

1. Write your markdown
2. Preview the rendered output
3. Export or save to the cloud

Nested lists work too:

- Cloud integrations
- GitHub repositories
- Dropbox folders
- Google Drive files
- OneDrive and Bitbucket
- Local features
- Auto-save to browser storage
- Image paste from clipboard

Task Lists

-

- [x] Set up the editor
- [x] Write some markdown
- [ ] Connect a cloud service
- [ ] Export the finished document

Links and Images

Link to any page with inline links or use reference-style links.

Images use a similar syntax:

Imágenes de Paisajes Hermosos | Descarga imágenes gratuitas ...

Blockquotes

> *The art of writing is the art of discovering what you believe.*
>
> *— Gustave Flaubert*

Blockquotes can contain other markdown elements:

> ***Tip:*** *Use* `Cmd+Shift+Z` *to enter zen mode for distraction-free writing.*

Code

Fenced code blocks support syntax highlighting:

```
function greet(name) {

return `Hello, ${name}.`;

}
console.log(greet("world"));
```

```
def fibonacci(n):

    a, b = 0, 1

for _ in range(n):

    a, b = b, a + b

return a
```

Tables

Shortcut	Action
`⌘ ⇧ Z`	Toggle zen mode
`Escape`	Exit zen mode
`?`	Keyboard shortcuts

Tables support alignment:

Feature	Status	Notes
Markdown editing	Active	Monaco-powered
Live preview	Active	Scroll-synced
Cloud sync	Available	5 providers
PDF export	Available	Server-rendered

Footnotes

Dillinger supports extended markdown syntax including footnotes[1] and definition lists.

Math

Inline math:

$$E = mc^2$$

Block equations:

$$\sum_{i=1}^{n} i = \frac{n(n+1)}{2}$$

Your documents save automatically. Start writing.

1. Footnotes appear at the bottom of the rendered preview.
